
FLUID/PARTICLE SEPARATION JOURNAL

COVERING

Research and development, graduate student contributions, elementary and advanced tutorials, chapter activities, and educational affairs, news from industry and government, and employment opportunities.

a Publication of

THE AMERICAN FILTRATION SOCIETY

devoted to

All aspects of fluid/particle separation

Volume 2, Number 2, June 1989

TABLE OF CONTENTS

Corporate Members	J1
Houston Meeting	J4
Centrifuging, Texas Chapter/Dow Chemical Meeting	J7
Washington Meeting	J8
Technology Transfer	J12
News From the Chapters.....	J14
Particulate Systems Throughout the World	J15
Personalities	J16
Book Reviews	J17
Earning the Right to Operate: A Vision for Chemical Safety Harold J. Corbett, Monsanto Company	J19
State of Pennsylvania Acid Rain Legislation Promotes Technology, John H. Broujos, Pennsylvania House of Representatives	J21

TECHNICAL PAPERS

Solid/Liquid Separation and FGD-What's New and What's Difficult Robert W. McIlvaine, McIlvaine Company	59
Operating Results of Several Baghouses in Dry FGD Service Mark Fiedler and Charles Barranger, Flakt, Inc.	62
A Study of Fine Coal Refuse Flocculation M.N. Badgular, University of Florida and S.H. Chiang, University of Pittsburgh	69
Characterization of a Sample of Coal Pyrite by AC Impedance Spectroscopy J. Pang and S. Chander, Pennsylvania State University	73
Practical Thickening Theory Applications, Richard I. Dick, Cornell University	77
Image Analysis of Particle Deposits in Model Fibrous Filters Bandaru V. Ramarao, Dept. of Paper Science & Engineering, SUNY-Environmental Science and Forestry	85
Overview of the Use of Polymeric Flocculants and Inorganic Coagulants in Filtration, Frank Mangravite, POLYPURE, Inc.....	95
Surfactant Effects in Dispersed and Flocculated Systems E.D. Goddard and K.P. Ananthapadmanabhan, Union Carbide Corp.	100
Flocculation in Turbulent Flow: Measurements and Modeling of Particle Size Distributions Leonard W. Casson, University of Pittsburgh and Desmond Lawler, University of Texas	104
A New Technique for Specific Filtration Resistance Measurement, Eduardo Cleto Pires, University of Sao Paulo, Brazil; Allan M. Springer, Miami University, Oxford, Ohio; Vinod Kumar, Graduate Student at Miami University	109

PURPOSE OF THE JOURNAL

Fluid-particle separation is a part of many fields including mining, environmental, pulp and paper, paints and coatings, food and beverages, coal, chemicals, automotive, drilling and production of petroleum, ceramics, biotechnology, air conditioning, clean rooms, electroplating, metal working, laundries, swimming pools, and pharmaceutical manufacture. Particles are encountered in ionic, macromolecular, micron, and millimeter sizes. They occur in many forms including suspensions, colloids, emulsions, foams, dusts, flocs, microorganisms, drops, pigments, aerosols, and pollen. Fluid-particle separation operations include cake filters, deep beds, clarifiers, thickeners, centrifuges, hydrocyclones, gas cyclones, membranes, reverse osmosis, electrodialysis, coalescers, scrubbers, electrostatic precipitators, expression, flotation, and heavy media separation. The *Fluid/Particle Separation Journal* provides an outlet for practical and theoretical contributions to fluid-particle separation and allied areas. It seeks to unite theoreticians and practitioners from many different fields by emphasizing the common principles which apply to fluid-particle separations wherever they may be encountered.

The *Journal* intends to satisfy the multifaceted needs of theoreticians and practitioners, salesmen and managers, manufacturers and users of equipments, and federal and local government agencies. It faces the challenge of charting a path leading to recognition of fluid-particle separation and processing and allied areas as a recognized branch of engineering and science.

The general structure will initially assume the following form:

1. Information concerning the Society
2. News and exchange with other societies
3. Discussion of current important issues
4. Research contributions
5. Practical contributions
6. Papers from graduate students
7. Tutorials
8. Educational issues
9. Comments from members
10. Local section activities
11. Advertisements

Subscriptions: The *F/PSJ* is published quarterly. The annual subscription is \$35.00. Single copies are \$10.00.
