
FLUID/PARTICLE SEPARATION JOURNAL

COVERING

Research and development, graduate student contributions, elementary and advanced tutorials, chapter activities, and educational affairs, news from industry and government, and employment opportunities.

a Publication of

THE AMERICAN FILTRATION SOCIETY

devoted to

All aspects of fluid/particle separation

Volume 2, Number 3, September, 1989

TABLE OF CONTENTS

Purpose of the Journal.....	2S
Corporate Members	3S
Houston Meeting	6S
Washington Meeting.....	8S
Conferences and Meetings	9S
Stop, Look, And Read	12S
Personalities	14S
Employment Opportunities	15S
Technology Transfer	16S
The Shoemaker's Column	18S
Quickening the Pace in Clean Coal Technology	19S

TECHNICAL PAPERS

Research Summaries	115
Aggregation and Adsorption Interdependence in Heterogeneous Systems	
Marc A. Anderson.....	116
Dynamic Modelling and Control of Wastewater Treatment Systems	
John F. Andrews	117
Micromixing Effects in Fast Aluminum Neutralization-Precipitation	
Mark M. Clark.....	119
Temperature and Geometric Effects on Orthokinetic Flocculation in a Turbulent Flow Field	
J.L. Cleasby.....	121
Mechanisms of Compressible Cake Filtration	
Richard I. Dick.....	123
Sludge Dewatering/Iron and Manganese Removal	
W.R. Knocke.....	124
Filtration, Sludge Thickening, and Fate of Toxics	
Desmond F. Lawler.....	125
Visual Analyses of Multicomponent Immiscible Flow in Heterogeneous Media	
Joel W. Massmann.....	126
The Influence of Chemical Contaminants on Permeability and Effective Porosity of Clays	
Namunu J. Meegoda.....	127
Desiccation Cracking of Clay Liners	
Carol J. Miller.....	128
Biofiltration of Water	
Gordon R. Pyper.....	129
Modeling Methodology For Dual-Function Stormwater Detention Basins	
Jy S. Wu and Robert C. Ahlert.....	130
Advanced Studies in Solid-Liquid Separation-Filtration, Sedimentation, and Expression:	
Japanese Report for Cooperative Research Under Japan-U.S Cooperative Science Program	
M. Shirato, T. Murase, E. Iritani, and M. Iwata.....	131
On the Dry Thermal and Wet Chemical Oxidation of Coal	
D.W. Fuerstenau, J. Diao, and G.C. Yang.....	136
Reverse Osmosis Treatment of Organic and Complex Hazardous Wastes	
J.V. Lepore and R.C. Ahlert.....	140
Liquid-Solid Separation-Factors That Can Ruin Your Day	
Donald A. Dahlstrom.....	149
Inorganic Filters for High Purity Gas	
S. Tousi and B. Gotlinsky.....	155
The <i>Micron</i> Rating of a Filter Medium: a Discussion of the Performance of Filter Media	
Peter R. Johnston.....	157

PURPOSE OF THE JOURNAL

Fluid-particle separation is a part of many fields including mining, environmental, pulp and paper, paints and coatings, food and beverages, coal, chemicals, automotive, drilling and production of petroleum, ceramics, biotechnology, air conditioning, clean rooms, electroplating, metal working, laundries, swimming pools, and pharmaceutical manufacture. Particles are encountered in ionic, macromolecular, micron, and millimeter sizes. They occur in many forms including suspensions, colloids, emulsions, foams, dusts, flocs, microorganisms, drops, pigments, aerosols, and pollen. Fluid-particle separation operations include cake filters, deep beds, clarifiers, thickeners, centrifuges, hydrocyclones, gas cyclones, membranes, reverse osmosis, electro dialysis, coalescers, scrubbers, electrostatic precipitators, expression, flotation, and heavy media separation. The *Fluid/Particle Separation Journal* provides an outlet for practical and theoretical contributions to fluid-particle separation and allied areas. It seeks to unite theoreticians and practitioners from many different fields by emphasizing the common principles which apply to fluid-particle separations wherever they may be encountered.

The *Journal* intends to satisfy the multifaceted needs of theoreticians and practitioners, salesmen and managers, manufacturers and users of equipments, and federal and local government agencies. It faces the challenge of charting a path leading to recognition of fluid-particle separation and processing and allied areas as a recognized branch of engineering and science.

The general structure will initially assume the following form:

1. Information concerning the Society
2. News and exchange with other societies
3. Discussion of current important issues
4. Research contributions
5. Practical contributions
6. Papers from graduate students
7. Tutorials
8. Educational issues
9. Comments from members
10. Local section activities
11. Advertisements

Subscriptions: The *F/PSJ* is published quarterly. The annual subscription is \$35.00. Single copies are \$10.00. Overseas surface postage charges are \$10.00 for a total of \$45.00. Airmail postage is \$18.00 for a total of \$53.00.
