
FLUID/PARTICLE SEPARATION JOURNAL

COVERING

Research and development, graduate student contributions, elementary and advanced tutorials, chapter activities, and educational affairs, news from industry and government, and employment opportunities.

a Publication of

THE AMERICAN FILTRATION SOCIETY

devoted to

All aspects of fluid/particle separation

Volume 2, Number 4, December, 1989

TABLE OF CONTENTS

Corporate Members	1D
Welcome to Washington	6D
Stop, Look and Read	11D
Vth World Filtration Congress	18D
Personalities	21D
Technology Transfer	23D
The Shoemaker's Column	24D
Advanced Fine-Coal Dewatering	26D
Effect of Shear Stress on the Performance of A Rotating Disk Type Dynamic Filter, Wei-Ming Lu, Ching-Jung Chuang, and Jinn-Yih Hwang.....	162
Reentrainment and Adhesion of Particles in a Shear Flow Field, John C. Hill and Chi Tien	170
Aggregate Density Effects on Sludge Thickening Rates, William R. Knocke, Catherine A. Barton, Jean Vollrath, John T. Novak.....	179
A Comparison of Optimum Backwashing of Filters With Water Fluidization and Air Scour, Appiah Amirtharajah	185
The State of the Art of Microfiltration and Its Expected Growth Until the Year 2000, Edward C. Gregor.....	190
A Systems Approach to Filtration of Completion Fluids, Todd W. Johnson	196
Temporal Changes in Oil and Air Filter Performance Due to Dust Deposition, Jeffrey A. Stinson, Matthew N. Meyers, Tadeusz Jaroszczyk and Barry M. Verdegan.....	202
Out of the Past	208
Studies on Filtration, J.W. Bain and A.E. Wigle	209
From Brazil	213
Relative Solid-Fluid Velocity in Irregular Particle Systems, Teodoro Politis, and Giulio Massarani.....	214
Index	217

PURPOSE OF THE JOURNAL

Fluid-particle separation is a part of many fields including mining, environmental, pulp and paper, paints and coatings, food and beverages, coal, chemicals, automotive, drilling and production of petroleum, ceramics, biotechnology, air conditioning, clean rooms, electroplating, metal working, laundries, swimming pools, and pharmaceutical manufacture. Particles are encountered in ionic, macromolecular, micron, and millimeter sizes. They occur in many forms including suspensions, colloids, emulsions, foams, dusts, flocs, microorganisms, drops, pigments, aerosols, and pollen. Fluid-particle separation operations include cake filters, deep beds, clarifiers, thickeners, centrifuges, hydrocyclones, gas cyclones, membranes, reverse osmosis, electrodialysis, coalescers, scrubbers, electrostatic precipitators, expression, flotation, and heavy media separation. The *Fluid/Particle Separation Journal* provides an outlet for practical and theoretical contributions to fluid-particle separation and allied areas. It seeks to unite theoreticians and practitioners from many different fields by emphasizing the common principles which apply to fluid-particle separations wherever they may be encountered.

The *Journal* intends to satisfy the multifaceted needs of theoreticians and practitioners, salesmen and managers, manufacturers and users of equipments, and federal and local government agencies. It faces the challenge of charting a path leading to recognition of fluid-particle separation and processing and allied areas as a recognized branch of engineering and science.

The general structure will initially assume the following form:

1. Information concerning the Society
2. News and exchange with other societies
3. Discussion of current important issues
4. Research contributions
5. Practical contributions
6. Papers from graduate students
7. Tutorials
8. Educational issues
9. Comments from members
10. Local section activities
11. Advertisements

Subscriptions: The *F/PSJ* is published quarterly. The annual subscription is \$35.00. Single copies are \$10.00. Overseas surface postage charges are \$10.00 for a total of \$45.00. Airmail postage is \$18.00 for a total of \$53.00.
