
FLUID/PARTICLE SEPARATION JOURNAL

COVERING

Research and development, graduate student contributions, elementary and advanced tutorials, chapter activities, and educational affairs, news from industry and government, and employment opportunities.

a Publication of

THE AMERICAN FILTRATION SOCIETY

devoted to

All aspects of fluid/particle separation

Volume 4, Number 3, September 1991

TABLE OF CONTENTS

Purpose of the Journal.....	1S
Corporate Members.....	2S
American Filtration Society Officers and Chapter Directory.....	6S
American Filtration Society Seventh National Meeting—Atlanta.....	8S
Fluid/Particle Processing&Separation Conference—Gainesville.....	9S
Filtration&Fluid/Particle Separation Exhibition—Chicago.....	11S
The Hershey Conference on the Pore.....	12S
Valley Forge—AFS Board Meets.....	14S
From the Chapters.....	16S
Stop, Look, and Read.....	17S
American Filtration Society Benefits and Concerns.....	20S
American Filtration Society Corporate Members Speak Out.....	21S
Research and Education.....	22S
Networks	25S
The Continuing Crisis in Solid-Fluid Separation Technology.....	26S
Conferences.....	27S
Publications	30S
The Shoemaker's Column.....	31S

TECHNICAL PAPERS

Comparison Between Taylor Vortex and Crossflow Filtration of Proteins and Mammalian Cell Broths, Peter F. Levy and Brad Yundt.....	147
Hydrodynamic Conditioning of Aluminum-Humic Acid Floc#, Mark M. Clark, Jean Michel Lainé, Mark R. Wiesner, and Joël Mallevialle.....	154
Effect of Physico-Chemical Parameters on Dewatering: A Case Study, Sandeep K. Sharma and B.J. Scheiner.....	162
Characterization of Dust Cake Filtration Using Laboratory Measured Quantities, Ta-Kuan Chiang, Richard A. Dennis, Larry D. Strickland, Charles M. Zeh.....	167
Hydrosol Deposition in Granular Media Under Unfavorable Surface Conditions—A Model, Rajasekar Vaidyanathan and Chi Tien	170
Research and Optimization of Filtration Processes, Alexander I. Yelshin.....	174
Relationship Between Sludge Rheology and Dewaterability Parameters, L. Spinoza, V. Lotito, and E. Infusino.....	176
Out of the Past: Filter-Pressing Slimes, M.W. von Bernewitz.....	180
Out of the Past: On the Influence of Pressure in the Phenomena of Endosmose and Exosmose, M. Becquerel	182

PURPOSE OF THE JOURNAL

Fluid-particle separation is a part of many fields including mining, environmental, pulp and paper, paints and coatings, food and beverages, coal, chemicals, automotive, drilling and production of petroleum, ceramics, biotechnology, air conditioning, clean rooms, electroplating, metal working, laundries, swimming pools, and pharmaceutical manufacture. Particles are encountered in ionic, macromolecular, micron, and millimeter sizes. They occur in many forms including suspensions, colloids, emulsions, foams, dusts, flocs, micro-organisms, drops, pigments, aerosols, and pollen. Fluid-particle separation operations include cake filters, deep beds, clarifiers, thickeners, centrifuges, hydrocyclones, gas cyclones, membranes, reverse osmosis, electrodialysis, coalescers, scrubbers, electrostatic precipitators, expression, flotation, and heavy media separation. The *Fluid/Particle Separation Journal* provides an outlet for practical and theoretical contributions to fluid-particle separation and allied areas. It seeks to unite theoreticians and practitioners from many different fields by emphasizing the common principles which apply to fluid-particle separations wherever they may be encountered.

The *Journal* intends to satisfy the multifaceted needs of theoreticians and practitioners, salesmen and managers, manufacturers and users of equipments; and federal and local government agencies. It faces the challenge of charting a path leading to recognition of fluid-particle separation and processing and allied areas as a recognized branch of engineering and science.

Subscriptions: The *F/PSJ* is published quarterly. The annual subscription is \$35.00. Single copies are \$10.00. Overseas surface postage charges are \$10.00 for a total of \$45.00. Airmail postage is \$18.00 for a total of \$53.00.
