

Mr. Leonard Castellano
Parker Hannifin

Leonard Castellano was part of a leadership team that created a centralized R & D Filtration Innovation Center for Parker Hannifin from the ground up as part of the acquisition of CLARCOR. He led teams on construction, the procurement of equipment, developing systems and policies, and eventually created new developments, processes and services for the LOBs including applying and obtaining VPP status through OSHA.

Leonard has over 40 years of experience in the filtration industry and has expertise in Membranes, Fibers, New Product Development and Surface Modification. He is Project Management Professional Certified and Blue Belt Certified in New Product Blueprinting. He currently handles IP strategies for the Parker Filtration Group and Special Projects.
