

Dr. Lin Zhao

Dow

Lin is a Research Scientist at Dow. His responsibility at Dow focuses on solid-liquid separation with 8 years of practical industrial experience from lab evaluation, filter design, pilot trial to production scale implementation. He also has experience in major site startup and operation. Before joining Dow, he obtained his Ph.D. degree in Chemical Engineering at the Ohio State University in Dr. W.S. Winston Ho's group with the research focus on advanced membranes for water desalination and gas separation.

Lin joined the American Filtration and Separations Society (AFS) in 2015, and has been actively involved in AFS since then. He is currently the member of the AFS Publication Committee, AFS Education Committee, and AFS Board of Directors. He also served as the instructor of the short course "Basic Solid/Liquid Separation" at AFS conferences.
