

FALL VIRTUAL CONFERENCE

S1.8: Testing Respirators, Masks and Face Coverings: Current Status and Proposed Changes

Tim Johnson
TSI Incorporated

BIO

Tim Johnson has a Bachelor's degree in Physics from Macalester College in St. Paul Minnesota. He has worked at TSI Incorporated for over 42 years and has worked with particle instruments and the Automated Filter Tester products since 1990. He is responsible for the product applications using automated filter test equipment and components used in filter testing applications. He is involved with standards development for a number of filter related standards and is an expert on several international standards groups. He is a convener of ISO/TC142/WG11 is a co-convener on a Joint working group between ISO/TS142/WG11 and IEC/TC59/WG17. Recent standard work is with ASTM and changes to F2100 (material for medical masks) and a new specification for barrier face coverings.
